

Autumn 2021

#WPRN21: the first international conference on Covid impacts

Almost two years after the beginning of the pandemic, the World Pandemic Research Network will host the first international conference on the **human, societal, economic impacts of the Covid-19 pandemic** which will take place fully remotely on 9-10 December 2021.

Researchers and practitioners from all areas of expertise and backgrounds will present ongoing projects, share and disseminate insights and results.

A unique opportunity to make connections for future collaboration.

WPRN21 is where the community meets.

The WPRN21 conference is supported by the Fondation Maison des Sciences de l'Homme.

Attendance in WPRN21 is entirely free and the conference is open and accessible to everyone.

Detailed program & Registration:

With over 1,000 registered research projects and initiatives, it seemed important to the World Pandemic Research Network team **to further encourage collective intelligence and foster interactivity** through a direct meeting.

During the December 9-10 WPRN conference, **presenters will discuss their research projects with the audience based on their video presentations in live Q&A sessions.** Some projects will also be given the opportunity to be highlighted in high-profile, moderated panel discussions in dedicated plenary time slots.

Authors will be given the option to publish a research note (WIP track) or full papers (Paper track) in official conference proceedings with an ISSN and full papers will undergo peer-review.

What is WPRN?

At a time when the world is facing a major health challenge, the Natural and Life Sciences are mobilized to find vaccines and remedies. At the same time, the Social Sciences and Humanities have moved to the forefront to help our societies face the lockdown and the wave of socio-economic crisis that follows. This mobilization, because it is unprecedented, needs new resources to coordinate, and new formats to build reflexivity to learn from our successes and our mistakes in view of the next crises. The World Pandemic Research Network (WPRN) contributes to meeting these needs through its platform wprn.org.

WPRN offers an infrastructure serving research communities based on both crowdsourcing and the mobilization of distributed referent expertise. It documents in real time what is being done in the world. It allows everyone to record their resources (research projects, calls for proposals, surveys, seminars, etc.), and to know who is doing what and where, and to get in touch with the relevant projects.

WPRN differs from other initiatives by the priority given to the human and social sciences, the robustness of its infrastructure anchored in the cloud and because it mobilizes an international and interdisciplinary network of «referents» who sort the projects, providing a first level of scientific edition. WPRN allows the sharing of data, questionnaires, and hypotheses in real time while maintaining the intellectual property (authorship) system of tracking and accountability. WPRN creates the conditions for accelerating «good» research and the emergence of new collaborative research formats.

Who is behind WPRN?

Initiated by the Paris Institute for Advanced Study and the RFIEA Foundation, WPRN is a non-profit research organisation. It has received support from the International Academic Union, which federates some 100 Academies in the humanities and social sciences in more than 60 countries, the European and global networks of Institutes of Advanced Studies NETIAS and UBIAS, the European Alliance for Social Sciences and Humanities (EASSH), the International Panel for Social Progress (IPSP) and the International Science Council (ISC).

WPRN also benefited from the generous support of the French ministry for Higher Education, Research and Innovation.

Members of the scientific board

A Scientific Board of 15 leading personalities in the human and social sciences

Nadia Al-Bagdadi Professor, Central European University ; Director, Central European University Institute for Advanced Study; Chair, Network of European Institutes for Advanced Study (Netias)

Pascale Allotey Director, International Institute for Global Health, United Nations University
Raouf Boucekkine Professor, Aix Marseille School of Economics ; Director, Mediterranean Institute for Advanced Research

Olivier Bouin Director, RFIEA Foundation, President, European Alliance for Social Sciences and Humanities, Coordinator, International Panel on Social Progress

Ama de Graft Aikins British Academy Global Professor, University College London - Institute for Advanced Study

Marc Fleurbaey Professor, Princeton University

Uichol Kim Professor, Inha University

Saadi Lahlou Professor, London School of Economics; Director, Paris Institute for Advanced Study

Vivian Lin Professor, Hong Kong University

Michal Linial Professor, Hebrew University of Jerusalem

Nora Lustig Professor, Tulane University; Senior Fellow, Brookings Institution ; Senior Fellow, Inter-American Dialogue

Helga Nowotny Professor, ETH Zurich; founder and former President, European Research Council

Guilherme Ary Plonski Professor, University of São Paulo (USP); Director, Institute of Advanced Studies (IEA-USP); Coordinator, University-Based Institutes for Advanced Study (UBIAS)

Elisa Reis, Professor, Federal University of Rio de Janeiro (UFRJ); Vice-President of the International Science Council; Chair, Interdisciplinary Research Network for the Study of Social Inequality (NIED)

Xiaobo Zhang Professor, Beijing University; Senior Fellow, IFPRI-Washington DC
